CONTENTS OF VOLUME 109

Number 1, 5 January 1977

Wood, E. J., Cayley, G. R. and Pearson, J. S., Oxygen Binding by the Haemocyanin from *Buccinum undatum* 1

Liebman, S. W., Stewart, J. W., Parker, J. H. and Sherman, F., Leucine Insertion Caused by a Yeast Amber Suppressor 13

Lindahl, L., Yamamoto, M., Nomura, M., Kirschbaum, J. B., Allet, B. and Rochaix, J-D., Mapping of a Cluster of Genes for Components of the Transcriptional and Translational Machineries of *Escherichia coli* . . 23

Sjöström, M. and Squire, J. M., Fine Structure of the A-band in Cryo-sections. The Structure of the A-band of Human Skeletal Muscle Fibres from Ultra-thin Cryo-sections Negatively Stained 49

Craig, R., Structure of A-segments from Frog and Rabbit Skeletal Muscle . 69

Imai, K., Yonetani, T. and Ikeda-Saito, M., Allosteric Effects in Cobalto-haemoglobin as Studied by Precise Oxygen Equilibrium Measurements . 83

Rossmann, M. G. and Argos, P., The Taxonomy of Protein Structure . . 99

Chapman, N. M. and Noller, H. F., Protection of Specific Sites in 16 S RNA from Chemical Modification by Association of 30 S and 50 S Ribosomes . 131

Number 2, 15 January 1977

Fitch, W. M., A Simple Method for the Analysis of Pyrimidine Tract Data . 151

Hickey, E. D., Weber, L. E., Baglioni, C., Kim, C. H. and Sarma, R. H., A Relation between Inhibition of Protein Synthesis and Conformation of 5-Phosphorylated 7-Methylguanosine Derivatives 173

Lenstra, J. A., Hofsteenge, J. and Beintema, J. J., Invariant Features of the Structure of Pancreatic Ribonuclease: A Test of Different Predictive Models 185

Wyman, J., Gill, S. J., Noll, L., Giardina, B., Colosimo, A. and Brunori, M., The Balance Sheet of Hemoglobin Thermodynamics of CO Binding by Hemoglobin Trout I 195

Compton, J. L. and Sinsheimer, R. L., Specific ϕX174 DNA Fragments as Internal Markers for the Mapping of ϕX174 DNA Molecules in the Electron Microscope 207

Compton, J. L. and Sinsheimer, R. L., Aligning the ϕX174 Genetic Map and the ϕX174/S13 Heteroduplex Denaturation Map 217

Nagano, K., Logical Analysis of the Mechanism of Protein Folding. IV. Super-secondary Structures 235

Nagano, K., Triplet Information in Helix Prediction Applied to the Analysis of Super-secondary Structures 251

Miller, J. H., Ganem, D., Lu, P. and Schmitz, A., Genetic Studies of the *lac* Repressor. I. Correlation of Mutational Sites with Specific Amino Acid Residues: Construction of a Colinear Gene–Protein Map 275

Appendix: Sommer, H., Biochemical Characterization of *lac* Repressor Proteins Produced by Suppression of Two Amber Mutations . . . 299

Schmeissner, U., Ganem, D. and Miller, J. H. Genetic Studies of the *lac* Repressor. II. Fine Structure Deletion Map of the *lac*I Gene, and its Correlation with the Physical Map 303

Goddard, J. M. and Cummings, D. J., Mitochondrial DNA Replication in *Paramecium aurelia*. Cross-linking of the Initiation End 327

Adolph, K. W. and Butler, P. J. G., Studies on the Assembly of a Spherical Plant Virus. III. Reassembly of Infections Virus Under Mild Conditions . 345

Letters to the Editor

Lorezon, H. A., Anevski, P. J. and Apirion, D., Antitermination and Absence of Processing of the Leftward Transcript of Coliphage Lambda in the RNAase III-Deficient Host 359

Mathies, R., Freedman, T. B. and Stryer, L., Resonance Raman Studies of the Conformation of Retinal in Rhodopsin and Isorhodopsin . 367

Number 3, 25 January 1977

Moorhouse, R., Winter, W. T., Arnott, S. and Bayer, M. E., Conformation and Molecular Organization in Fibers of the Capsular Polysaccharide from *Escherichia coli* M41 Mutant 373

Noll, M. and Kornberg, R. D., Action of Micrococcal Nuclease on Chromatin and the Location of Histone H1 393

Wrigley, N. G., Laver, W. G. and Downie, J. C., Binding of Antibodies to Isolated Haemagglutinin and Neuraminidase Molecules of Influenza Virus Observed in the Electron Microscope 405

Tsujimoto, Y. and Ogawa, H., Intermediates in Genetic Recombination of Bacteriophage T7 DNA 423

HAMES, B. D. and PERRY, R. P., Homology Relationship Between the Messenger RNA and Heterogeneous Nuclear RNA of Mouse L Cells. A DNA Excess Hybridization Study 437

WAGNER, P. D. and WEEDS, A. G., Studies on the Role of Myosin Alkali Light Chains. Recombination and Hybridization of Light Chains and Heavy Chains in Subfragment-1 Preparations 455

Appendix: POPE, B. J., WAGNER, P. D. and WEEDS, A. G., Heterogeneity of Myosin Heavy Chains in Subfragment-1 Isoenzymes from Rabbit Skeletal Myosin 470

SHAW, P. J. and MUIRHEAD, H., Crystallographic Structure Analysis of Glucose 6-Phosphate Isomerase at 3·5 Å Resolution 475

NUMBER 4, 5 FEBRUARY 1977

ISHII, T. and YANAGIDA, M., The Two Dispensable Structural Proteins (*soc* and *hoc*) of the T4 Phage Capsid; their Purification and Properties, Isolation and Characterization of the Defective Mutants, and their Binding with the Defective Heads *in vitro* 487

YANAGIDA, M., Molecular Organization of the Shell of T-even Bacteriophage Head. II. Arrangement of Subunits in the Head Shells of Giant Phages . 515

FRANKEL, G., COCKBURN, A. F., KINDLE, K. L. and FIRTEL, R. A., Organization of the Ribosomal RNA Genes of *Dictyostelium discoideum*. Mapping of the Transcribed Region 539

SPRADLING, A., PARDUE, M. L. and PENMAN, S., Messenger RNA in Heat-shocked *Drosophila* Cells 559

LETTERS TO THE EDITOR

PARRY, G., DAVIE, C. and WILLIAMS, D. J., Topography and Mobility of Ribosomes on the Surface of Isolated Endoplasmic Reticulum of Rat Liver 589

DEUTSCHER, M. P. and EVANS, J. A., Transfer RNA Nucleotidyltransferase Repairs All Transfer RNAs Randomly. 593

Index to Volume 109

A-band structure of human skeletal muscle fibres from ultra-thin cryo-sections negatively stained, 49

Adolph, K. W. & Butler, P. J. G., Studies on the assembly of a spherical plant virus. III. Reassembly of infectious virus under mild conditions, 345

Alkali light chains of myosin, studies on their role: recombination and hybridization of light chains and heavy chains in subfragment-1 preparations, 455

Allet, B. (see also Lindahl, L.), 23

Allosteric effects in cobaltohaemoglobin as studied by precise oxygen equilibrium measurements, 83

Amber suppressor of yeast causes leucine insertion, 13

Anevski, P. J. (see also Lorezon, H. A.), 359

Antibody binding to isolated haemagglutinin and neuraminidase molecules of influenza virus observed in the electron microscope, 405

Antitermination and absence of processing of the leftward transcript of coliphage lambda in the RNAase III-deficient host, 359

Apirion, D. (see also Lorezon, H. A.), 359

Argos, P. (see also Rossman, M. G.), 99

Arnott, S. (see also Moorhouse, R.), 373

A-segment structure for frog and rabbit skeletal muscle, 69

Assembly of a spherical plant virus: reassembly of infectious virus under mild conditions, 345

Association of 30 S and 50 S ribosomes protects specific sites in 16 S RNA from chemical modification, 131

Bacteriophage ϕX174 DNA fragments, specific, as internal markers for the mapping of ϕX174 DNA molecules in the electron microscope, 207

— — — genetic map, alignment with the ϕX174/S13 heteroduplex denaturation map, 217

— T4 capsid, the two dispensable structural proteins (*soc* and *hoc*): their purification and properties, isolation and characterization of the defective mutants, and their binding with the defective heads *in vitro*, 487

— T7 DNA, intermediates in genetic recombination, 423

—, T-even, giant, arrangement of subunits in the head shells, 515

Baglioni, C. (see also Hickey, E. D.), 173

Balance sheet of a hemoglobin: thermodynamics of CO binding by hemoglobin trout I, 195

Bayer, M. E. (see also Moorhouse, R.), 373

Beintema, J. J. (see also Lenstra, J. A.), 185

Binding of antibodies to isolated haemagglutinin and neuraminidase molecules of influenza virus observed in the electron microscope, 405

— — CO by hemoglobin trout I, thermodynamic balance sheet, 195

— — oxygen by the haemocyanin from *Buccinum undatum*, 1

Brunori, M. (see also Wyman, J.), 195

Buccinum undatum haemocyanin and oxygen binding, 1

Butler, P. J. G. (see also Adolph, K. W.), 345

Capsid, T4 phage, the two dispensable structural proteins (*soc* and *hoc*): their purification and properties, isolation and characterization of the defective mutants, and their binding with the defective heads *in vitro*, 487

Capsular polysaccharide fibers from *Escherichia coli* M41 mutant, conformation and molecular organization, 373

Cayley, G. R. (see also Wood, E. J.), 1

Chains, heavy, myosin, heterogeneity in subfragment-1 isoenzymes from rabbit skeletal myosin, 470

—, light, alkali, of myosin, studies on their role: recombination and hybridization of light chains and heavy chains in subfragment-1 preparations, 455

Chapman, N. M. & Noller, H. F., Protection of specific sites in 16 S RNA from chemical modification by association of 30 S and 50 S ribosomes, 131

Chromatin, action of micrococcal nuclease, and the location of histone H1, 393
CO binding by hemoglobin trout I, thermodynamic balance sheet, 195
Cobaltohaemoglobin, allosteric effects as studied by precise oxygen equilibrium measurements, 83
Cockburn, A. F. (see also Frankel, G.), 539
Coliphage lambda, antitermination and absence of processing of the leftward transcript in the RNAase III-deficient host, 359
Colosimo, A. (see also Wyman, J.), 195
Compton, J. L. & Sinsheimer, R. L., Aligning the ϕX174 genetic map and the ϕX174/S13 heteroduplex denaturation map, 217
Compton, J. L. & Sinsheimer, R. L., Specific ϕX174 DNA fragments as internal markers for the mapping of ϕX174 DNA molecules in the electron microscope, 207
Conformation and molecular organization in fibers of the capsular polysaccharide from *Escherichia coli* M41 mutant, 373
— of 5-phosphorylated 7-methylguanosine derivatives and its relation to the inhibition of protein synthesis, 173
— — retinal in rhodopsin and isorhodopsin, resonance Raman studies, 367
Craig, R., Structure of A-segments from frog and rabbit skeletal muscle, 69
Cryo-sections, ultra-thin, negatively stained, of human skeletal muscle fibres, and the structure of the A-band, 49
Crystallographic structure analysis of glucose 6-phosphate isomerase at 3·5 Å resolution, 475
Cummings, D. J. (see also Goddard, J. M.), 327

Davie, C. (see also Parry, G.), 589
Deletion map, fine structure, of the *lac*I gene, and its correlation with the physical map; genetic studies of the *lac* repressor, 303
DNA excess hybridization study: homology relationship between the mRNA and heterogeneous nuclear RNA of mouse L cells, 437
—, mitochondrial, replication in *Paramecium aurelia;* cross-linking of the initiation end, 327
— of bacteriophage T7, intermediates in genetic recombination, 423
— — ϕX174, specific fragments as internal markers for the mapping of ϕX174 DNA molecules in the electron microscope, 207
Deutscher, M. P. & Evans, J. A., Transfer RNA nucleotidyltransferase repairs all transfer RNAs randomly, 593
Dictyostelium discoideum, organization of the ribosomal RNA genes. Mapping of the transcribed region, 539
Downie, J. C. (see also Wrigley, N. G.), 405
Drosophila, messenger RNA in heat-shocked cells, 559

Electron microscopic mapping of ϕX174 DNA molecules, specific ϕX174 DNA fragments as internal markers, 207
— — observations of the binding of antibodies to isolated haemagglutinin and neuraminidase molecules of influenza virus, 405
Escherichia coli M41 mutant, conformation and molecular organization in fibers of the capsular polysaccharide, 373
— —, mapping of a cluster of genes for components of the transcriptional and translational machineries, 23
Evans, J. A. (see also Deutscher, M. P.), 593

Fibers of the capsular polysaccharide from *Escherichia coli* M41 mutant, conformation and molecular organization, 373
Firtel, R. A. (see also Frankel, G.), 539
Fitch, W. M., A simple method for the analysis of pyrimidine tract data, 151
Folding of protein, logical analysis of the mechanism; super-secondary structures, 235
Frankel, G., Cockburn, A. F., Kindle, K. L. & Firtel, R. A., Organization of the ribosomal RNA genes of *Dictyostelium discoideum*. Mapping of the transcribed region, 539
Freedman, T. B. (see also Mathies, R.), 367
Frog and rabbit skeletal muscle, structure of A-segments, 69

GANEM, D. (see also MILLER, J. H.), 275
— (see also SCHMEISSNER, U.), 303
Gene cluster, mapping for components of the transcriptional and translational machineries of *Escherichia coli*, 23
—, ribosomal RNA, organization for *Dictyostelium discoideum*. Mapping of the transcribed region, 539
Genetic recombination of bacteriophage T7 DNA, intermediates, 423
— studies of the *lac* repressor. Correlation of mutational sites with specific amino acid residues: construction of a colinear gene–protein map, 275
— — — — — —. Fine structure deletion map of the *lac*I gene, and its correlation with the physical map, 303
GIARDINA, B. (see also WYMAN, J.), 195
GILL, S. J. (see also WYMAN, J.), 195
Glucose 6-phosphate isomerase, crystallographic structure analysis at 3·5 Å resolution, 475
GODDARD, J. M. & CUMMINGS, D. J., Mitochondrial DNA replication in *Paramecium aurelia*. Cross-linking of the initiation end, 327

Haemagglutinin and neuraminidase molecules, isolated, of influenza virus, electron microscopic observations of antibody binding, 405
Haemocyanin from *Buccinum undatum* binds oxygen, 1
Haemoglobin (see also Hemoglobin)
HAMES, B. D. & PERRY, R. P., Homology relationship between the mRNA and heterogeneous nuclear RNA of mouse L cells. A DNA excess hybridization study, 437
Head shells of giant T-even phages, arrangement of subunits, 515
Heat-shocked *Drosophila* mRNA, 559
Helix prediction and triplet information, application to the analysis of super-secondary structures, 251
Hemoglobin balance sheet: thermodynamics of CO binding by hemoglobin trout I, 195
HICKEY, E. D., WEBER, L. E., BAGLIONI, C., KIM, C. H. & SARMA, R. H., A relation between inhibition of protein synthesis and conformation of 5-phosphorylated 7-methylguanosine derivatives, 173
Histone H1 location and the action of micrococcal nuclease on chromatin, 393
hoc and *soc* dispensable structural proteins of the T4 phage capsid: their purification and properties, isolation and characterization of the defective mutants, and their binding with the defective heads *in vitro*, 487
HOFSTEENGE, J. (see also LENSTRA, J. A.), 185
Homology relationship between the mRNA and heterogeneous nuclear RNA of mouse L cells. A DNA excess hybridization study, 437
Human skeletal muscle fibres from ultra-thin cryo-sections negatively stained, structure of the A-band, 49
Hybridization and recombination of myosin alkali light chains and heavy chains in subfragment-1 preparations, 455
— study for DNA excess: homology relationship between the mRNA and heterogeneous nuclear RNA of mouse L cells, 437

IKEDA-SAITO, M. (see also IMAI, K.), 83
IMAI, K., YONETANI, T. & IKEDA-SAITO, M., Allosteric effects in cobaltohaemoglobin as studied by precise oxygen equilibrium measurements, 83

—, super-secondary, and triplet information in helix prediction, 251
Stryer, L. (see also Mathies, R.), 367
Super-secondary structure analysis and triplet information in helix prediction, 251
— — structures and logical analysis of the mechanism of protein folding, 235
Suppressor, amber, yeast, causes leucine insertion, 13
Synthesis of protein, a relation between its inhibition and the conformation of 5′-phosphorylated 7-methylguanosine derivatives, 173

(see also Bacteriophage), 487
(see also Bacteriophage), 423
xonomy of protein structure, 99
even bacteriophage, giant, arrangement of subunits in the head shells, 515
ermodynamics of CO binding by hemoglobin trout I, 195
anscript, leftward, of coliphage lambda, antitermination and absence of processing in the RNAase III-deficient host, 359
ranscriptional and translational machineries of *Escherichia coli*, mapping of a cluster of genes for components, 23
ansfer RNA nucleotidyltransferase repairs all transfer RNAs randomly, 593
anslational and transcriptional machineries of *Escherichia coli*, mapping of a cluster of genes for components, 23
iplet information in helix prediction applied to the analysis of super-secondary structures, 251
out I hemoglobin, thermodynamic balance sheet of CO binding, 195
UJIMOTO, Y. & OGAWA, H., Intermediates in genetic recombination of bacteriophage T7 DNA, 423

rus, influenza, binding of antibodies to isolated haemagglutinin and neuraminidase molecules observed in the electron microscope, 405
plant, spherical: reassembly of infectious virus under mild conditions, 345
